

Expertise and regulatory assistance

AET and its multidisciplinary team (standards experts, technicians, project engineers) with 25 years of experience support you to ensure the compliance of your products with French, European and international regulatory requirements through the following topics:

NORMALIZATION

- > Defense of corporate interests through direct participation in international, European and French standardization committees
- > Follow-up of the projects of modifications of the standards of electrical safety, EMC and fitness for use (Committees UF61, UF 59...)

SUPPORT FOR THE COMPLIANCE OF YOUR PRODUCTS

Our experts and technicians support you to identify and resolve potential deviations:

- > Partial verification of construction
- > Compliance Campaign Management

REGULATORY CONFORMITY

Our technical experts and standards accompany you to ensure that your product meets the various regulatory requirements, using tools such as:

- > Regulatory compliance watch
- > Assistance in monitoring scheduled changes in standards as well as changes in the guidelines on which your products depend
- > The regulatory expertise hotline

ASSISTANCE FOR MARKET LAUNCH

- > CE Marking & international certification
- > Regulatory compliance file analysis (TCF)
- > Outsourced management of the certification process (Europe and international)
- > Management and piloting of tests for compliance with chemical requirements : REACH, ROHS, Alimentarity...
